Project Name	Smart Lender: Machine Learning-Based Loan Approval Prediction System
Maximum Marks	

Project Planning

Introduction

The Project Planning document defines the overall execution strategy for developing the Smart Lender Loan Approval Prediction System. It outlines the project phases, key activities, deliverables, team responsibilities, and the structured development approach required for successful completion of the project.

Project Objectises

- Develop an intelligent loan approval prediction system using Machine Learning
- Automate the loan evaluation process to reduce manual effort
- Ensure accurate and consistent loan approval predictions
- Build a secure and user-friendly web application
- Minimize processing time for loan applications
- Provide data-driven decision support for financial institutions
- Enable scalability for handling large volumes of applications
- Ensure proper documentation and reporting throughout the project

Conclusion

The Work Breakdown Structure provides a systematic approach for executing the Smart Lender Loan Approval Prediction System by dividing the entire development process into manageable phases. This structured planning improves coordination, monitoring, and ensures successful and timely project completion.
