

Demonstration of Proposed Features

Date	03 July 2026
Team ID	
Team Size	3
Team Leader	Chakali Basavaraju
Team Member 1	Girish C
Team Member 2	Shaik Sameer
Team Member 3	
Team Member 4	
Project Name	Smart Lender: Machine Learning-Based Loan Approval Prediction System
Maximum Marks	

Demonstration of Proposed Features:

This document presents all the features proposed during the planning phase of the Smart Lender Loan Approval Prediction System and tracks their implementation and demonstration status. It serves as evidence of the team's ability to successfully deliver the planned intelligent loan prediction solution.

S.No	Feature Name	Description	(Implemented / Partial Pending)	Demonstrated Yes NO)	
	User Management	Secure user and login With authentication.	Implemented	Yes	Functional per PEP guidelines.
2	Applicant Form	Interactive form for collecting personal and financial details with input validation	Implemented	Yes	Includes real time input validation.
3	Data Preprocessing Module	Handles data cleaning, normalization, label encoding, and feature scaling using Pandas and Scikit-learn	Implemented	Yes	Using Pandas and Sci kit-learn
4	ML Prediction Engine	Processes applicant data using a trained ML model to predict loan approval status with confidence score_	Implemented	Yes	Generates status d confidence

5	Database Integration	Secure storage and retrieval of applicant records and prediction history	Implemented	Yes	Using MYSQL Database
6	Dashboard	Admin dashboard for monitoring system performance, predictions, and generating reports	Implemented	Yes	Analytics and report generation.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (0/0)	100%
