

Demonstration of Proposed Features

Date	03 July 2026
Team ID	
Team Size	3
Team Leader	Chakali Basavaraju
Team Member 1	Girish C
Team Member 2	Shaik Sameer
Team Member 3	
Team Member 4	
Project Name	
Maximum Marks	

Demonstration of Proposed Features:

This document outlines all the features proposed during the planning phase of the **Smart Lender Loan Approval Prediction System** and tracks their implementation and demonstration status. It validates the team’s ability to successfully design, develop, and deliver a complete intelligent loan prediction solution.

SENO	Feature Name	Description	(Implemented I Partial / pending)	Dem d (Yes / No)	Remarks
1	User Management	Secure user registration login with authentication.	Implemented	Yes	Functional a s per PEP guidelines.
2	Applicant Form Workflow	Interactive form for collecting personal and financial data with real-time input validation	Implemented	Yes	Ensures accurate and validated user input.
3	Data Preprocessing Module	Performs data cleaning, normalization, label encoding, and feature scaling	Implemented	Yes	Built using Pandas and Scikit-learn.
4	ML Prediction Engine	Processes applicant data using trained ML models to predict loan approval with confidence score	Implemented	Yes	Generates status and confidence
5	Database Integration	Secure storage and retrieval of application records and prediction history	Implemented	Yes	Using MySQL database,
6	Admin Dashboard	Enables monitoring of system performance, predictions, and analytics	Implemented	Yes	Provides reporting and insights.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate	100%
